FREQUENTLY ASKED

SMARTBOTTLE™ FACTS

WHY DOES SMARTBOTTLE™ LOOK LIKE A DISPOSABLE BOTTLE?

The fact that Smartbottle™ looks like a disposable bottle makes it familiar and easy to use. Other reusable bottles are either made of polycarbonate plastic, which is not BPA-free, or metal. Metal bottles can be difficult to adjust to and may not be as comfortable to use. Just remember—Smartbottle™ is REUSABLE and DO NOT throw it away!

- CAN SMARTBOTTLE™ GO IN THE RECYCLE BIN?

- IS SMARTBOTTLE™ SAFE FOR CHILDREN?
- IS THE PLASTIC CAP ON SMARTBOTTLE™ DISHWASHER SAFE?

1 BOTTLE REPLACES 365 SINGLE-USE PLASTIC BOTTLES

Smartbottle™ can replace 365 single-use plastic bottles (average use of one bottle per day). Multiplied by millions of consumers who drink bottled water in North America, this translates into a staggering number of single-use plastic bottles NOT going to landfills or being recycled at high energy costs with limited recycling possibilities.

Generate your own renewable electricity and automatically send excess energy back to your utility provider

What is Net Metering?

The price you pay for electricity rises every year. Net metering allows you to take control of your costs and reduce your dependency on the grid.

Net metering allows you to power your home first with your solar system, and feed excess solar energy back to the power grid for a credit. This process is automatic and will show up as a credit on your bill.

Your net metering credits offset the power supplied by your electric company at night, or during times you consume more than your solar system produces.

Generate clean electricity, reduce your carbon footprint and save thousands!

Act now – Spots on the grid are first come, first serve.

SYNOPSIS

IT WAS ALWAYS HER

The world is at war and many believe the president is at fault. Whether anyone could have prevented the series of events which drove regional wars to become a global one is unclear. But, as has always been, we need to blame someone. For most, the man in charge is an obvious choice.General George Emmerson plots to send someone back in time to assassinate the president in high school. For the mission, he chooses Bruce Meyer, a first year student at West Point, who is an orphan and won't be missed. At the last minute, however, the general is persuaded to change his plans. He instructs Bruce instead to save the girl who can prevent the war by marrying the future president. The problem is, Bruce falls in love with her too.It Was Always Her is a gripping tale about love, sacrifice and the impossible choices faced by a man with a second chance.

J. L. Witterick believes that there is nothing more meaningful than to love and be loved, completely and absolutely. She is the international best-selling author of My Mother's Secret and Actually a Good Thing.

A Message From the Author

I loved creating this story. To be able to say that anything is possible if we connect with eachother through kindness, understanding and courage and to do it with refrence to true events, well that was exhilarating.

Knee Pain Relief & Injury

Knee pain can result from disease, overuse injury, or trauma. Among American adults, approximately 25% have experienced knee pain that affects the function of their knee. Knee pain and conditions related to the knee are common. In runners, the knee is the part of the body that is injured most often. Changes to the knee related to aging (osteoarthritis) commonly occur in people over the age of 50. Thousands of steps, squats, and twists to the knee over a long life can cause changes to cartilage and other parts of the knee.

We can help with:

Anterior knee pain
Lateral knee pain
Medial knee pain
Pain caused by a ligament tear
Pain caused by osteoarthritis, or OA

Knee Pain

Knee pain is caused by damage or issues to tissues both inside the knee and outside the knee joint. Inside the knee joint, stability is determined by the shape and health of your cartilage, also known as your meniscus, in addition to the ligaments supporting the knee – the ACL, PCL and LCL. Outside the knee joint, stability is provided by the muscles surrounding the knee and the MCL. The knee/cap is a largely complicating factor, often out of position and causing pain and irritation to the surrounding tissues. Common signs of knee pain or injury include knee swelling, weakness or giving way, clicking or locking.

Common causes of knee pain are

Kneecap (patella) issues
Muscle weakness, strains, or injuries
ACL/PCL or MCL/LCL
Meniscus strains, tears, injuries
Knee osteoarthritis

FAQ

How Can a Physical Therapist Help?

Physiotherapy is a healthcare profession that aims to help individuals recover from injuries, manage pain, and improve overall physical well-being. Our expert physiotherapists use a variety of techniques, exercises, and manual therapies to address musculoskeletal issues, sports injuries, post-surgical rehabilitation, and more. If you are experiencing persistent pain, limited mobility, or recovering from an injury or surgery, physiotherapy may be beneficial for you.
